THE FOLLOWING REPORT WAS PREVIOUSLY

25X1

The Soviet catapult ship B-229 (Cyrillic) was observed off Kronstadt in August 1952. This ship is about 100 meters long, with a raked bow and probably a cruiser stern. It apparently is motor driven. A high bridge located at the stern serves as a platform for a crane. The flight deck of the ship appears to be completely flat, while small deck houses are located on the bow at either side of the runway.
